Bachelor's Degree in Business Administration, specializing in Management
 Stockholm University (2013 – 2015)

Upper Secondary Education, Science Program
 Blackeberg High School (2007 – 2010)

ADDITIONAL INFO

Swedish B-Driver's License (car) | Boat License

Languages:
 Swedish – Native
 English – Professional proficiency
 Norwegian – Basic proficiency

Fullstack developer & co-founder

Student Node (acq. by Poolia, 2019) | 2014–Present

After acquisition (2019–present) – Fullstack developer

- Rebuilt a legacy platform (10+ years old) into a modern fullstack application using TypeScript, React, MUI, and Node.js — completed within 9 months.

- Developed and maintained multiple systems, including matching engines, invoicing flows, admin panels, and booking tools, with a focus on efficiency and user experience [Node.js, TypeScript, React, MUI].

- Built APIs and integrated external platforms such as SAP Fieldglass and Magnit, ensuring scalability and robust architecture [Node.js, TypeScript].

- Designed scalable frontend and backend solutions using Firebase and GCP for hosting, databases, authentication, and serverless logic [Firebase, GCP, Node.js, TypeScript].

- Enhanced user interfaces and optimized performance for event platforms used by clients like Poolia and QRIOS.

- Collaborated closely with product teams and stakeholders to translate business needs into technical solutions and clean, maintainable code.

Before acquisition (2014–2019) – Co-founder & Head of Product

- Co-founded and grew the company from idea to a leading SaaS platform for career fairs in Sweden.

- Defined and prioritized features, user flows, and product strategy for the company's first SaaS offering.

- Worked closely with developers on frontend (HTML/CSS/JavaScript) to deliver intuitive user interfaces.

- Led business model development, growth strategy, and client relationships, culminating in acquisition by Poolia in 2019.
