

ERIK STURESSON

FULLSTACK DEVELOPER /
TECH LEAD

Technical project manager with experience leading complex IT and digitalization projects. Currently driving strategic initiatives at T34MS / Affibody, focusing on identity and master data systems. Skilled in translating business needs into robust technical solutions, coordinating cross-functional teams, and delivering projects on time, within budget, and with measurable business impact. Experienced in stakeholder management, risk mitigation, and aligning business, technology, and user needs.

EXPERIENCE

Fullstack developer & Tech Lead

Affibody (konsult) | (2025–Present)

Tech stack: TypeScript, Node.js, React, FluentUI, Azure (Functions, CosmosDB), Docker, CI/CD (GitHub Actions)

- Led development of Identity & Master Data Hub integrating multiple HR systems with Azure AD.
- Built backend services, APIs, and frontend admin tools; optimized performance, scalability, and security.
- Enterprise focus: master data and identity systems for large organizations.

Fullstack developer & Tech Lead

T34MS | (2025–Present)

Tech stack: TypeScript, Node.js, React, FluentUI, Azure (Functions, CosmosDB), Docker, CI/CD (GitHub Actions)

- Designed and implemented secure access management and approval workflows.
- Developed verification system for enterprise authentication (T34MS product).
- Startup/product focus: Rapid development of scalable web apps and user-friendly solutions.
