

ERIK STURESSON

TECHNICAL PRODUCT & DIGITALIZATION LEADER

Technical product leader with experience building, scaling, and managing digital products that deliver measurable business value. Currently leading product and digitalization initiatives at T34MS / Affibody, responsible for strategic systems in identity and master data. Translates business needs into technical solutions and works closely with development teams to ensure delivery, quality, and customer impact. Experienced in leading cross-functional teams and aligning business, technology, and user needs.

EXPERIENCE

T34MS / Affibody | 2025–Present

IT Consultant — Product & Digitalization Lead

- Leading digitalization initiatives for Affibody, focusing on identity and master data systems.
- Driving the development of an Identity & Master Data Hub integrating HR systems with Azure AD.
- Designing and implementing secure access management and approval workflows.
- Developing a verification application for enterprise authentication (T34MS product).

Student Node (acq. by Poolia) | 2014–2025

Co-founder, CEO & Head of Product

- Co-founded and led Sweden's leading SaaS platform for student fairs and recruitment (acquired by Poolia).
- Led product strategy, roadmap, and cross-functional teams. Built scalable solutions for job matching, events, and enterprise administration.
- Platform used by 2,000+ employers and 20,000+ students across 50+ career fairs at universities nationwide.
