

ERIK STURESSON

LEADER IN TECH & INNOVATION |
PRODUCT & BUSINESS DEVELOPMENT

EXPERIENCE

T34MS / Affibody | 2025–Present

IT Consultant — Product & Digitalization Lead

Leads development and digital transformation initiatives for Affibody, with responsibility for designing and implementing strategic systems in identity and master data.

Drives the development of the Identity & Master Data Hub, integrating HR systems with Azure AD for access rights, managerial approvals, and secure data management.

Responsible for strategic system design and implementation, including API integrations and security structures, creating scalable and efficient solutions.

Also develops an identity verification platform that enables secure customer authentication, improving processes and data safety.

Collaborates with IT architects and stakeholders to translate business needs into technical solutions with a strong focus on value and user experience.

The role combines hands-on fullstack development with consultative leadership toward the client.

Student Node (acq. by Poolia) | 2014–2025

VD & Co-founder / Product Owner

Co-Founded and led Student Node, Sweden's leading SaaS platform for student fairs and recruitment, later acquired by Poolia.

Responsible for product strategy, roadmap, and team leadership, including development, sales, and customer success. Created solutions that automated job matching, event platforms, and enterprise administration. Ensured customer value and market alignment, contributing to successful growth and eventual acquisition.

PROFILE

Entrepreneur and product leader with experience in building digital products that drive business value. Founded and led Student Node, Sweden's leading SaaS platform for student fairs and recruitment, which was later acquired by the publicly listed company Poolia.

Currently driving the implementation of strategic systems in digitalization, identity, and master data for T34MS and Affibody, with responsibility for both product direction and technical solutions that enhance processes, security, and user experience.

Thrives in roles that bridge business, technology, and users — with a focus on strategic decisions and concrete impact.

EDUCATION

Bachelor's Degree in Business
Administration (Management)
Stockholm University | 2013–2015

Science Program, Natural Science
Blackeberg Gymnasium | 2007–2010

Norwegian – Basic Knowledge

SUPPLEMENTARY EXPERIENCE

Student Node – Ledarskap & Produktutveckling (page 2)

VD & Co-founder / Product Owner

Through leading teams, managing client relationships, and acting as a mentor and coach, I have developed a strong ability to understand and meet the needs of both customers and colleagues. This experience has given me deep insight into group dynamics and how to create cohesive, high-performing teams — a key strength in successfully leading product development and delivering solutions that truly meet customer needs. I have also learned the importance of clear communication between technical and non-technical stakeholders, allowing me to act as a bridge between business and technology to ensure alignment toward a shared vision.

Author | Lecturer | Consultant

eriksturesson.se | 2015–Present

Led projects including website development, writing and publishing a book, and teaching at the vocational school FEI within event and sales education.

Digital & IT Lead (Volunteer)

Rotary & Business Network | 2015–Present

Responsible on a voluntary basis for digitalization, IT solutions, and event systems (custom-built with admin support), email campaigns, member data management, and GDPR compliance.

Teamleader

Viafone Sweden AB | 2011

Led a team of up to 40 people, responsible for recruitment, training, and coaching. Implemented structured training programs that increased sales by over 50%.

Squad Leader

Swedish Air Force, Rifle Platoon | 2010

Led a platoon through soldier training. The only platoon in the company where every member completed the final march and tests. Motivated and coached the group through speeches and clear focus on teamwork.
